— SKILL FINGERPRINT

SKILL	SCORE VS. AVG	
SQL	3.0	▼ 3.8 (avg 6.8)
Python	1.0	▼ 5.2 (avg 6.2)
Pandas	1.0	▼ 4.8 (avg 5.8)
Data Visualization	0.0	▼ 6.0 (avg 6.0)
Applied Statistics	3.0	▼ 2.5 (avg 5.5)
Machine Learning	1.0	▼ 4.2 (avg 5.2)
A/B Testing	2.0	▼ 4.4 (avg 6.4)

— UPSKILLING ROADMAP

Ordered by where the effort pays off fastest: the widest gaps first, then the skills already close to solid.

SKILL	VS. AVG	WHY IT MATTERS	RESOURCE
01 Focus first The widest gaps versus the cohort — start here.			
● Data Visualization	-6.0	Cultivating your data visualization abilities will enable you to effectively communicate insights and tell compelling data stories, vital for stakeholder engagement.	<i>No dedicated resource yet</i>
● Python	-5.2	Enhancing your Python skills will empower you to tackle complex data tasks and build robust solutions, crucial for technical interviews and project work.	<i>No dedicated resource yet</i>
● Pandas	-4.8	Strengthening your Pandas expertise will greatly improve your efficiency in data cleaning and analysis within Python, a key expectation in data roles.	<i>No dedicated resource yet</i>
● A/B Testing	-4.4	Improving your A/B testing knowledge will strengthen your ability to design and interpret experiments for product optimization, a valuable skill in industry.	<i>No dedicated resource yet</i>
● Machine Learning	-4.2	Focusing on machine learning fundamentals will expand your capacity to build and evaluate predictive models, a core competency in many data science careers.	→ Supervised and unsupervised learning

SKILL	VS. AVG	WHY IT MATTERS	RESOURCE
● SQL	-3.8	Developing your SQL proficiency will significantly strengthen your ability to extract and manipulate data, a critical skill for many data science roles and interviews.	→ SQL Joins and Window functions
● Applied Statistics	-2.5	Developing your applied statistics foundation will deepen your understanding of data inference and experimental design, crucial for rigorous analytical work.	→ Statistics guide

— STUDY CALENDAR

28 focused sessions, T+1 through T+32 — "T" is the day you start, with one rest day built in every week. Same order as the roadmap above — widest gaps first.

DAY	SKILL	FOCUS	WHAT & HOW TO STUDY
T+1	● Data Visualization	Learn	Work through the core concepts end-to-end using the resource below — note anything unfamiliar.
T+2		Practice	Solve 8–10 untimed problems focused only on this topic.
T+3		Timed practice	Simulate real conditions: 5 problems in 25 minutes, no notes.
T+4		Review & consolidate	Redo every problem you missed and summarize the topic in 3 lines, in your own words.

DAY	SKILL	FOCUS	WHAT & HOW TO STUDY
T+5	● Python	Learn	Work through the core concepts end-to-end using the resource below — note anything unfamiliar.
T+6		Practice	Solve 8–10 untimed problems focused only on this topic.
T+8		Timed practice	Simulate real conditions: 5 problems in 25 minutes, no notes.
T+9		Review & consolidate	Redo every problem you missed and summarize the topic in 3 lines, in your own words.
T+10	● Pandas	Learn	Work through the core concepts end-to-end using the resource below — note anything unfamiliar.
T+11		Practice	Solve 8–10 untimed problems focused only on this topic.
T+12		Timed practice	Simulate real conditions: 5 problems in 25 minutes, no notes.
T+13		Review & consolidate	Redo every problem you missed and summarize the topic in 3 lines, in your own words.
T+15	● A/B Testing	Learn	Work through the core concepts end-to-end using the resource below — note anything unfamiliar.
T+16		Practice	Solve 8–10 untimed problems focused only on this topic.
T+17		Timed practice	Simulate real conditions: 5 problems in 25 minutes, no notes.
T+18		Review & consolidate	Redo every problem you missed and summarize the topic in 3 lines, in your own words.

DAY	SKILL	FOCUS	WHAT & HOW TO STUDY
T+19	● Machine Learning	Learn	Work through the core concepts end-to-end using the resource below — note anything unfamiliar. → Supervised and unsupervised learning
T+20		Practice	Solve 8–10 untimed problems focused only on this topic. → Supervised and unsupervised learning
T+22		Timed practice	Simulate real conditions: 5 problems in 25 minutes, no notes. → Supervised and unsupervised learning
T+23		Review & consolidate	Redo every problem you missed and summarize the topic in 3 lines, in your own words. → Supervised and unsupervised learning
T+24	● SQL	Learn	Work through the core concepts end-to-end using the resource below — note anything unfamiliar. → SQL Joins and Window functions
T+25		Practice	Solve 8–10 untimed problems focused only on this topic. → SQL Joins and Window functions
T+26		Timed practice	Simulate real conditions: 5 problems in 25 minutes, no notes. → SQL Joins and Window functions
T+27		Review & consolidate	Redo every problem you missed and summarize the topic in 3 lines, in your own words. → SQL Joins and Window functions

DAY	SKILL	FOCUS	WHAT & HOW TO STUDY
T+29	● Applied Statistics	Learn	Work through the core concepts end-to-end using the resource below — note anything unfamiliar. → Statistics guide
T+30		Practice	Solve 8–10 untimed problems focused only on this topic. → Statistics guide
T+31		Timed practice	Simulate real conditions: 5 problems in 25 minutes, no notes. → Statistics guide
T+32		Review & consolidate	Redo every problem you missed and summarize the topic in 3 lines, in your own words. → Statistics guide
