

— TEST SUMMARY

Hi Phase2 — here's how it went.

35-question assessment, completed August 09, 2026.

35/35

Questions answered

33Correct
94% accuracy**2**Incorrect
6% of total

— SKILL FINGERPRINT

SKILL	SCORE VS. AVG
SQL	10.0 ▲ 3.2 (avg 6.8)
Python	10.0 ▲ 3.8 (avg 6.2)
Pandas	9.0 ▲ 3.2 (avg 5.8)
Data Visualization	10.0 ▲ 4.0 (avg 6.0)
Applied Statistics	9.0 ▲ 3.5 (avg 5.5)
Machine Learning	10.0 ▲ 4.8 (avg 5.2)
A/B Testing	10.0 ▲ 3.6 (avg 6.4)

— UPSKILLING ROADMAP

Ordered by where the effort pays off fastest: the widest gaps first, then the skills already close to solid.

SKILL	VS. AVG	WHY IT MATTERS	RESOURCE
03 Maintain & leverage Already ahead of the cohort — keep these sharp.			
● Machine Learning	+4.8	Your advanced machine learning expertise positions you to develop sophisticated models and solve complex predictive problems, a highly sought-after skill.	→ Supervised and unsupervised learning
● Data Visualization	+4.0	Your strong data visualization abilities enable you to communicate complex insights clearly, making your analyses more impactful in presentations and reports.	<i>No dedicated resource yet</i>
● Python	+3.8	Your robust Python proficiency provides a strong foundation for scripting, automation, and complex data analysis tasks in any technical interview.	<i>No dedicated resource yet</i>
● A/B Testing	+3.6	Your strong understanding of A/B testing allows you to confidently design and interpret experiments, driving impactful product and business decisions.	<i>No dedicated resource yet</i>
● Applied Statistics	+3.5	Your exceptional grasp of applied statistics will empower you to design robust experiments and draw reliable conclusions, a key strength in analytical roles.	→ Statistics guide

SKILL	VS. AVG	WHY IT MATTERS	RESOURCE
● SQL	+3.2	Your strong SQL skills will be a significant asset in data manipulation and querying, making you highly effective in data-driven roles.	→ SQL Joins and Window functions
● Pandas	+3.2	Excelling in Pandas means you can efficiently handle and analyze large datasets, a critical advantage for data wrangling challenges in your career.	<i>No dedicated resource yet</i>

— STUDY CALENDAR

7 focused sessions, T+1 through T+8 — "T" is the day you start, with one rest day built in every week. Same order as the roadmap above — widest gaps first.

DAY	SKILL	FOCUS	WHAT & HOW TO STUDY
T+1	● Machine Learning	Maintain	Skim your notes and solve 2–3 problems just to keep it sharp — no need to relearn this one. → Supervised and unsupervised learning
T+2	● Data Visualization	Maintain	Skim your notes and solve 2–3 problems just to keep it sharp — no need to relearn this one.
T+3	● Python	Maintain	Skim your notes and solve 2–3 problems just to keep it sharp — no need to relearn this one.
T+4	● A/B Testing	Maintain	Skim your notes and solve 2–3 problems just to keep it sharp — no need to relearn this one.
T+5	● Applied Statistics	Maintain	Skim your notes and solve 2–3 problems just to keep it sharp — no need to relearn this one. → Statistics guide
T+6	● SQL	Maintain	Skim your notes and solve 2–3 problems just to keep it sharp — no need to relearn this one. → SQL Joins and Window functions

DAY	SKILL	FOCUS	WHAT & HOW TO STUDY
T+8	● Pandas	Maintain	Skim your notes and solve 2–3 problems just to keep it sharp — no need to relearn this one.
